

## DC1192

### Input /Output module

Interactive, AnalogPLUS/SynoLOOP, collective/SynoLINE600

AlgoRex  
Synova™

- **In-/output module suitable for**
  - collective fire detection system as detection line coupler
  - interactive and AnalogPLUS/SynoLOOP fire detection system for the connection of up to 25 fire detectors with collective/SynoLINE600 address, or for the connection of monitored alarm devices
- **Operation with additional DC 24 V supply**
- **Microprocessor-controlled evaluation and line isolation function**
- **Housing for surface mounting with M20 cable entries**
- **Robust construction for use in dry, dusty and wet areas**

## Characteristics

---

- **Function in the interactive and AnalogPLUS/SynoLOOP fire detection system**
  - Address assignment during commissioning via the key on the electronics unit.
  - Correct addressing is indicated by the flashing of the LED.
  - The key and LED are only accessible or visible when the housing is open.
- **Application in the collective/SynoLINE600 fire detection system**
  - For galvanic isolation (detection line coupler) between control unit and e.g. shunt Zener diode barrier SB3 with fire detectors for explosion-hazard areas.
- **Application in the interactive and AnalogPLUS/SynoLOOP fire detection system**
  - For the connection of fire detectors with collective/SynoLINE600 address (special detectors or via shunt Zener diode barriers, detectors for explosion-hazard areas) or for the activation of alarm devices.
  - For connection on the line direct as a bus user.

- **Built-in line separators**
  - Any short-circuit on the detector bus is located from the central control unit and the defective part is isolated between two line separators. A ring-connection installation guarantees optimum safety.

## Installation

---

- The housing with cover DCA1191 and the terminal plate DCB1192A are required for installation.
- The housing has six M20 threaded cable entries to feed in the cable.
- The DCA1192A electronics unit is only inserted after the wiring check shortly before commissioning.
